Simple Process

Times-7 has the largest RAIN (UHF) RFID antenna portfolio to cover a broad range of applications for any industry. However, some application requirements are so specific that the standard antennas in the market, including Times-7's, might not be an optimum solution.

We Can Help

Building on over 12 years' experience Times-7 can rapidly develop a design or modify an existing antenna design to meet your or your customers' special requirements of size, shape, RF performance and more.

With typically low design and development fees, we can quickly develop prototypes and samples for your conformance testing.

From embedded near-field antennas to rugged ground antennas and one-offs to high volume — Times-7 delivers on time and to your expectations.
